MEDA

CREATING DIGITIZED AFFORDABLE HEALTHCARE

MEDA

Our Massively Transformative Purpose (MTP):

*"To **digitize, democratize** and **disrupt** healthcare, providing instant affordable care to over a billion people in the next 10 years."*

MEDA

Our Team

Scott Corlett

CEO

- **30+** YR Serial Entrepreneur
- YPO'er
- MIT - GOT
- Virtual Technologist
- Wrote Patent in 2001 Online Design Method
- Founder of Virtual Forums in YPO w- Zoom Founder Eric Yuan

Gurvinder Batra

CTO

- Co-Founder of KiwiTech
- Built over **1000** technology platforms
- Served as CTO and President of the world's largest publishing services co.

MEDA

Advisory Board

Tamara Loehr
Board

- Co-founder of Beusail Academy and Concertina, focused on providing growth strategies to **$20M+** privately owned companies looking to scale and exit.
- Named by Forbes in the Top 11 Most Impactful Female Leaders, and made the Top 150 Real Leaders 2024 list

Asha Saxena
Board

- **Founder** of Women Leaders in Big Data and AI (WLDA.tech)
- Professor Columbia Business School
- Masters in Data and Machine Learning
- YPO'er

Rebecca Pasternik-Ikard
Board

- Lawyer, Nurse and former CEO of Medicaid in Oklahoma
- Responsible for a **$5.5 billion** budget
- Served on the Board of Directors of National Association of Medicaid Directors (NAMD)

Dr. Chris Corney
Board

- **Physician** and Investor
- Clinical Insights and Strategic Vision
- Advocate for AI-Driven Healthcare
- Experienced in Medical Practice Management
- Supporter of Innovative Health Technologies

Professor Damian Griffin
Board

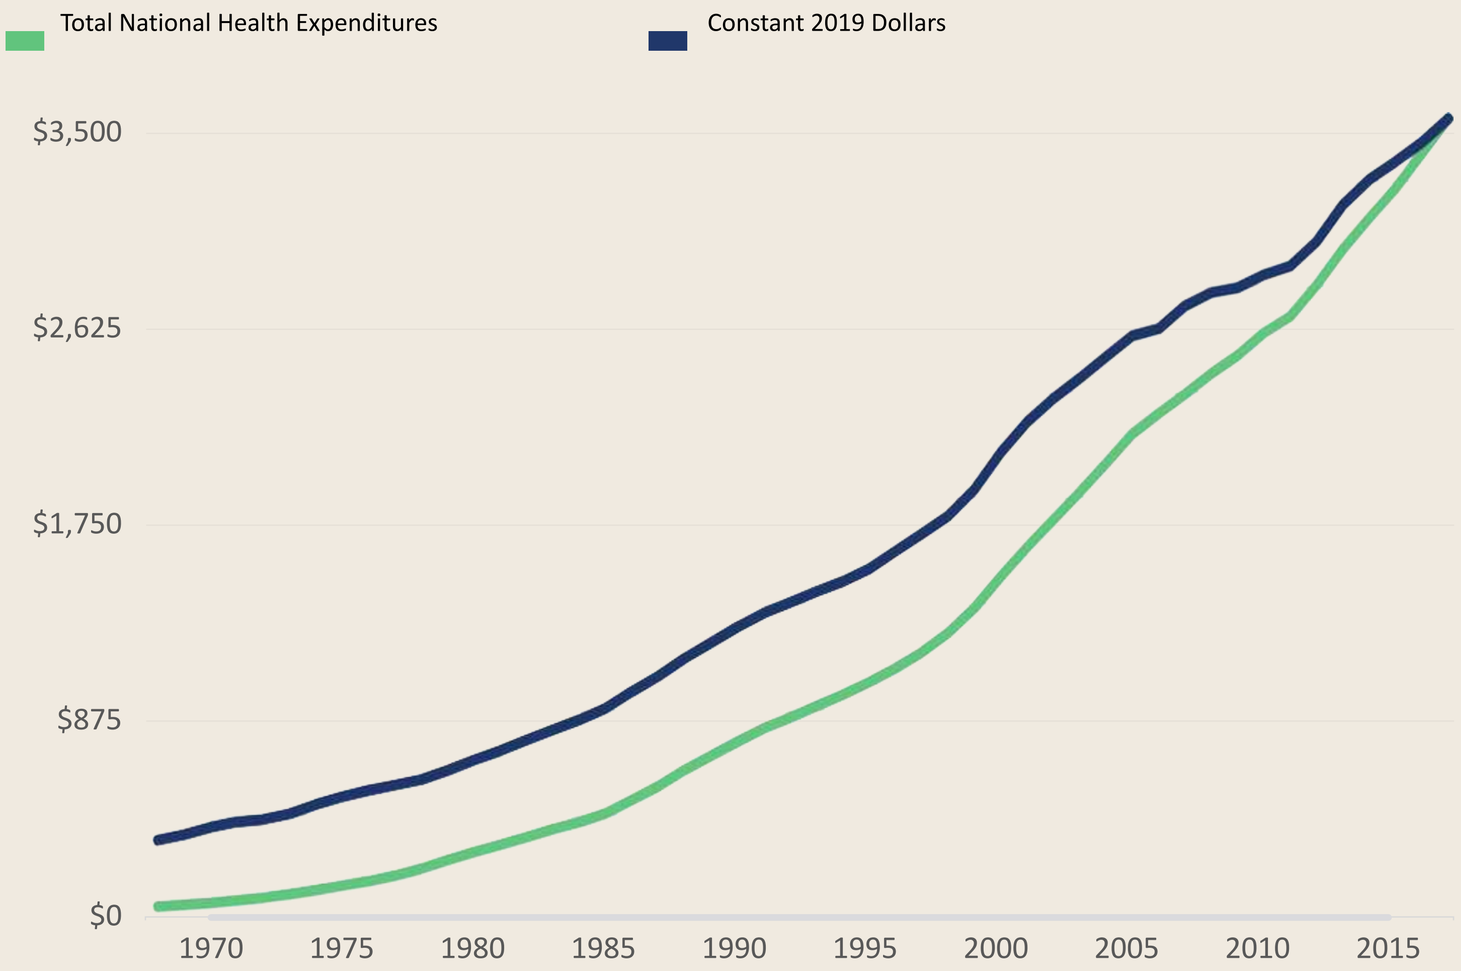
- **Leading** Orthopedic Surgeon
- Academic and Clinical Innovator
- Expert in Preoperative and Postoperative Care
- Advocate for AI in Healthcare
- Strategic Advisor to MEDA's Board

MEDA

Healthcare costs are soaring

According to data released by the Centers for Medicare and Medicaid Services (CMS), total health expenditures in the U.S. have been on the rise. In 1970, health spending totaled **$74.1 billion**, but by 2019, that number had rocketed to **$3.8 trillion**.

Total national health expenditures, US $ Billions, 1970-2019



Note: A constant dollar is an inflation adjusted value used to compare dollar value from one period to another.

Solution

Our platform features a patented virtual assistant on a mobile device that uses machine learning AI LLM’s trained on healthcare diagnosis to generate responses based on the patient’s symptoms. It includes a human-like face that adapts mouth movements and expressions, enhancing the sense of a real interaction.

Our Patented Technology

Patent

- **The platform includes a virtual assistant operable to automatically generate responses to a patient using machine learning in order to further identify details regarding the patient's symptoms and needs. The virtual assistant includes a digitally generated human face that automatically adapts mouth-movements and facial expressions to match the automatically generated responses in order to provide a feeling of interacting with a human assistant.**

- **Patent: US20240185999A1**

https://patents.google.com/patent/US11908577B2/en

- **Title**: System and method for virtual health assistant
- **Summary**: This patent describes a virtual assistant system that uses artificial intelligence (AI) to engage with patients through natural conversations. The system offers personalized medical advice, can adapt facial expressions to match responses, and integrates with electronic health records (EHR) to provide seamless patient-practitioner communication.
- **Value to MEDA**: **This is MEDA's core intellectual property. It enhances patient engagement by providing human-like interaction in telemedicine, improving the quality of digital healthcare. The integration of AI and machine learning personalizes healthcare experiences, automates initial assessments, and supports practitioners in delivering care efficiently.**

MEDA Patent: Strategic IP Value

Filed for and have been granted Continuation Rights
Enable us to extend, adapt, and strengthen our IP—targeting new use-cases and markets while increasing enforceability and licensing potential.

Filed for and have been Granted International Filings
Provide market exclusivity in key global regions (EU, Australia, New Zealand), enhancing commercial value and positioning us for cross-border licensing and partnerships.

Valuation Impact
Together, these assets form a defensible IP moat and significantly uplift our valuation in M&A, licensing, and investor due diligence, projected to increase IP value significantly.

MEDA

Who We Are & What We Do?

MEDA is a patented AI-enabled disruptive digital health company that is transforming healthcare by providing artificial human doctors on an iPhone or Android device to discuss your healthcare needs. We leverage AI trained on healthcare diagnosis data. Once a diagnosis hypothesis is created, the patient is immediately connected to a human doctor along with the ICD-10 diagnosis codes, so the doctor understands the patient's needs and can quickly provide care. This cuts over 50% of the time a doctor needs to spend with a patient. In addition to offering a “Doctor in your Pocket” 24/7, Our patented technology also offers a complete solution for the preoperative, intraoperative, and postoperative management of patients. This allows healthcare providers to streamline workflows, enhance clinical efficiency, and focus more on patient outcomes.

MEDA

Artificial Human Doctors

- **AI-Powered Virtual Doctors:** Our virtual doctors use video synthesis technology to assess symptoms, form diagnosis hypotheses, and connect patients with human doctors for further care, lab orders, and prescriptions.
- **Automated Diagnosis**: After asking questions and gathering information, our system runs data through our AI/ML solution, leveraging the Google healthcare cloud to recommend the most appropriate human doctor based on the patient's needs.
- **Customizable Virtual Doctors:** Choose from a variety of virtual doctors by gender, ethnicity, and language. We offer over 40 languages, including English, Spanish, French, German, Japanese, and more (see video links below).

MEDA

The Patient’s App

Easy Sign-Up and Payment: Patients can sign up and manage payments through the app, including Medicaid account authentication.

Instant Virtual Visits: The app enables instant face-to-face visits with virtual doctors, followed by human Care Providers if needed.

Appointment Scheduling: Patients can schedule future appointments directly through the app.

User Ratings: The system allows patients to rate their experience with practitioners using a 5-star system similar to Uber.

Prescription Management: The app handles prescription refill requests, tracks current medications, and provides access to lab results.

Our platform offers all the tools necessary for a seamless healthcare visit, designed to deliver a superior online experience compared to traditional physical visits.

MEDA

Practitioners' Website

Dashboard Access: Practitioners can log in to view their dashboard for managing appointments, patient records, chat, and notifications.

Flexible Scheduling: Like Uber drivers, practitioners can set their work hours and create their schedules to suit their lifestyle.

Virtual Care Options: Practitioners can offer both instant & scheduled virtual care.

Patient Management: They have access to patient history and can write prescriptions and request lab work.

Integrated Tools: The site is integrated with EPIC for patient data management, and API plugins automate transcription with ICD-10 diagnosis codes, helping care providers save time and increase revenue.

MEDA

Administration Website

Multi-Level Access: The administration platform supports login with multiple access levels.

Comprehensive Dashboard: The dashboard provides an overview of key data, including total patients, practitioners, appointments, and pending verifications.

Practitioner Onboarding: Our staff can onboard practitioners, verifying credentials, licenses, and insurance.

Secure Management: We securely manage patient information and ensure patient satisfaction.

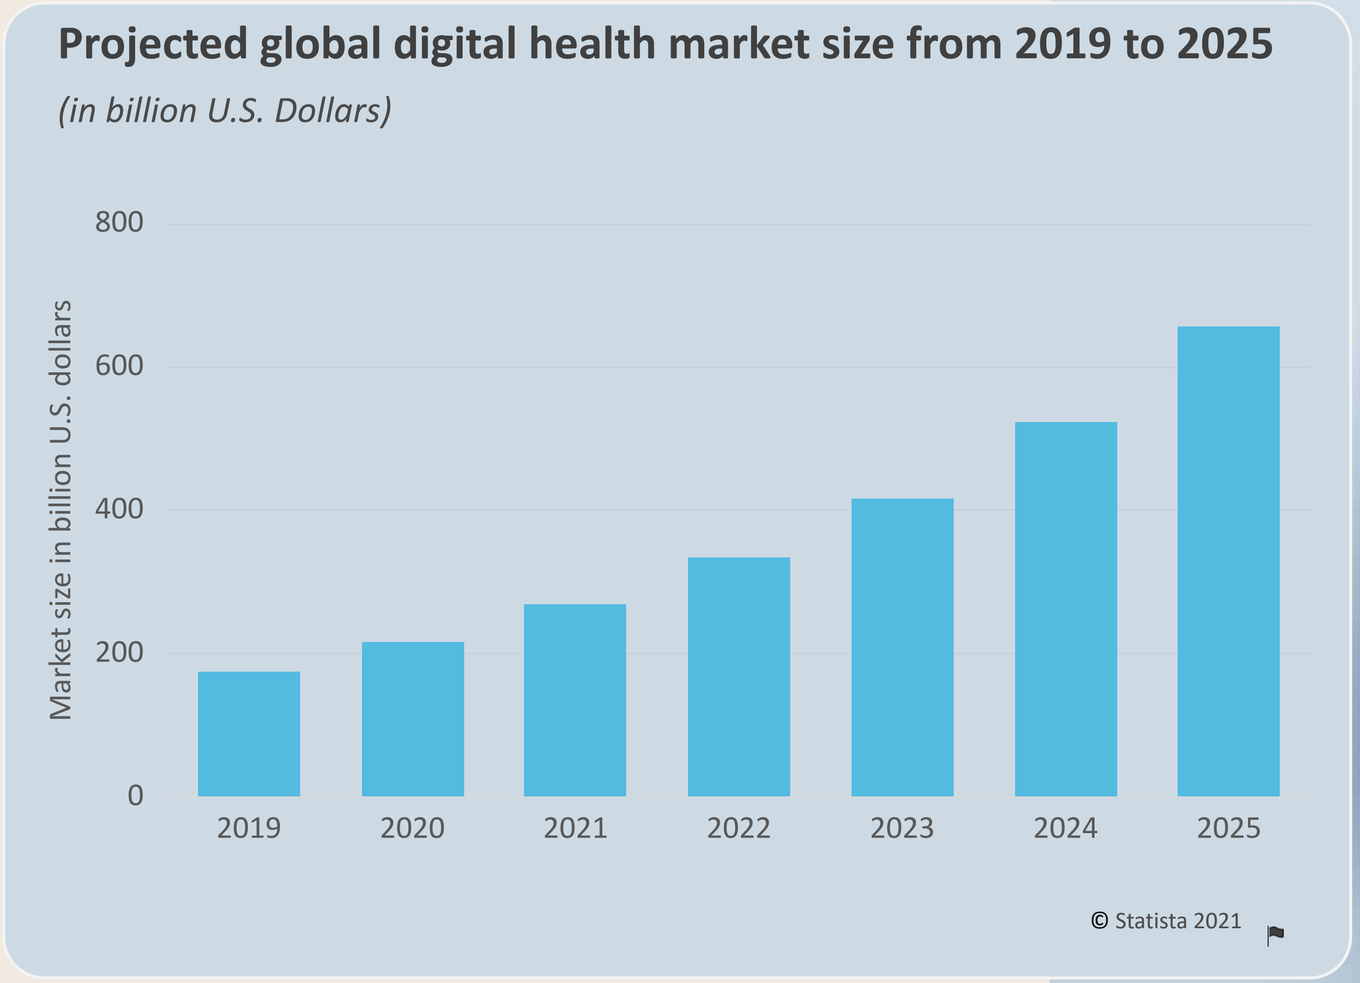
MEDA

Competitive Analysis

- We are the only company with the **patent** on artificial humans leveraging AI in healthcare, dramatically lowering costs and scalability globally.
- Unlike many competitors that integrate with existing, flawed systems, our platform is designed from the ground up for **efficiency**.
- We operate with significantly **lower overhead** compared to hospitals and traditional healthcare companies.
- Our services are more **affordable** for both consumers and Medicaid.
- Amwell reached 80 million users by year 4; we conservatively project achieving half that number.
- Amwell had a $5 billion valuation in 2020, highlighting the potential in this market.
- Numerous “unicorns” are expected to emerge in this space, driven by innovative healthcare solutions.

MEDA

Market Size



Medicaid

- Medicaid is projected to become a **trillion dollar program by 2026**.
- Currently, 74 million Americans are enrolled in Medicaid.
- Provider invoices typically paid in 15 days.

Medicaid is likely to be a ~$1 trillion program by 2026

Medicaid expenditures, $ Billion

McKinsey & Company

Financial Projections

Key Assumptions and Components

1. **Revenue Streams**:
   - **Subscriptions**: Offering AI-driven healthcare services through subscription models to healthcare providers and patients.
   - **Transaction Fees**: Charging per consultation or interaction via AI-driven virtual care services.
   - **Licensing/Partnerships**: Licensing MEDA's AI and video synthesis technology to healthcare institutions, SaaS companies, or integration into existing healthcare solutions (e.g., Harris).
   - **Expansion**: Expansion to different geographic markets and scaling usage.
2. **Cost Components**:
   - **Research and Development (R&D)**: Continuous development of AI models, video synthesis, and healthcare applications.
   - **Sales and Marketing**: Costs to acquire healthcare providers, institutions, and partnerships.
   - **Technology Infrastructure**: Cloud services, servers, and platforms to support AI technology.
   - **Personnel Costs**: Salaries for developers, support staff, marketing, and management.

Year 1 Projections (Launch Phase)

- **Revenue**: Limited, as this is the launch year. Focus on customer acquisition.
  - Subscription Revenue: $200,000 (assuming early sign-ups of healthcare institutions)
  - Transaction Revenue: $50,000
  - Licensing Revenue: $100,000
  - **Total Revenue**: $350,000
- **Costs**:
  - R&D: $500,000
  - Sales & Marketing: $300,000
  - Technology/Infrastructure: $200,000
  - Personnel: $400,000
  - **Total Costs**: $1,400,000
- **Net Profit (Loss)**: -$1,050,000 (Focus on scaling and customer acquisition)

Year 2 Projections (Growth Phase)

- **Revenue**: Expected strong growth from new customer acquisition and expanded licensing deals.
  - Subscription Revenue: $1,500,000 (more healthcare providers onboarded)
  - Transaction Revenue: $300,000
  - Licensing Revenue: $500,000
  - **Total Revenue**: $2,300,000
- **Costs**:
  - R&D: $600,000 (continuous improvement and patent filings)
  - Sales & Marketing: $600,000 (increased to fuel growth)
  - Technology/Infrastructure: $400,000
  - Personnel: $600,000
  - **Total Costs**: $2,200,000
- **Net Profit**: $100,000 (break-even or slight profit expected)

Year 3 Projections (Scaling Phase)

- **Revenue**: Significant increase as MEDA becomes more established in the market.
  - Subscription Revenue: $4,000,000 (scaling across institutions and individuals)
  - Transaction Revenue: $1,000,000
  - Licensing Revenue: $1,500,000 (integration with large healthcare providers like Harris)
  - **Total Revenue**: $6,500,000
- **Costs**:
  - R&D: $800,000
  - Sales & Marketing: $1,000,000
  - Technology/Infrastructure: $600,000
  - Personnel: $1,000,000
  - **Total Costs**: $3,400,000
- **Net Profit**: $3,100,000 (significant profit as the business scales)

Summary

- **Year 1**: Focus on establishing the product and acquiring initial customers, resulting in losses due to heavy upfront costs.
- **Year 2**: Revenue growth begins to outpace costs, achieving breakeven or small profitability.
- **Year 3**: Scaling of revenue streams, particularly through SaaS subscriptions and licensing, leads to substantial profitability.

These are rough projections and will be refined with more specific data from MEDA's business strategy, customer pipeline, and operational costs.

MEDA

Strategic Financial Roadmap

	Immediate	Short-term	Medium-term
Initiatives	Raise **$2m** in equity (CN/SAFE) Build MEDA app Build MEDA social media platform Integrate with EPIC & Google CCAI	Raise **$10m** in equity to enable growth Integrate with Apple & Android personal health devices Integrate with Uber health transportation solutions	Rollout 10 markets and practitioners from outside U.S.
Goals	Open in the OK Medicaid market Build virtual practice of practitioners Build US patient community via advertising campaigns	Open 5-10 core markets with Medicaid Build US practitioner community Build international patient community via crisis campaigns	Build advertising network to fund non-insurance visits globally 1 Billion users in 10 years

MEDA

Investment Opportunity and Use of Proceeds

MEDA is seeking $2 million in convertible notes

@$10 million valuation

Use of Proceeds	Percentage
SaaS Platform and App Development	80%
Sales & Marketing	20%
