& your practice

NEW ActaStim Patient Insights Portal
Direct access to healing insights

Get hands-on Theragen support at every step

Our team works as an extension of yours, delivering insights directly to your team and helping you keep patients on the path to recovery.

Remotely monitor your patients' recovery

The new ActaStim portal provides daily visibility into your patients' progress, helping you guide them to a successful fusion.

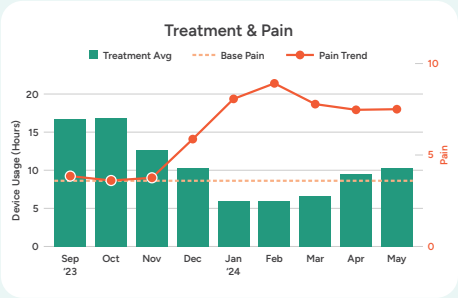
ActaStim®·S Theragen™

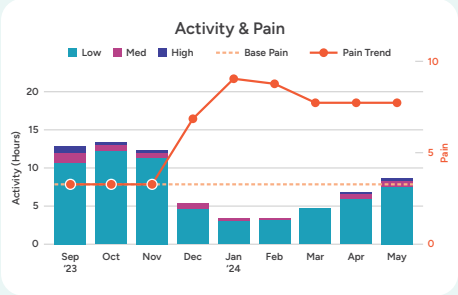
Inside the **ActaStim Patient Insights Portal**

See clinically relevant trends that help you guide patients' recovery.

Track true wear time + pain

Our proprietary algorithm combines actual therapy delivery and reported pain to reveal compliance and pain deviations.





See relative activity + pain

The ActaStim algorithm works with built-in device sensors to capture changes in daily activity and shifts in patients' progress.

Easily access patient insights

Log in anytime to view their therapy delivery, evolving pain trends, and activity levels.

Stay connected between visits

The portal clearly shows patients' day-to-day journey, so you never lose track of their recovery.

Enhance each clinic visit

Use accurate patient recovery metrics to facilitate meaningful discussions with your patients.

Be alerted to deviations

Your dashboard automatically highlights patients who may or may not be on the ideal path to recovery.

Schedule a demo to see how the ActaStim system supports you, your team, and your patients.
