Centers for Medicare & Medicaid Services (CMS)
Office of the National Coordinator for Health Information Technology (ONC)

Subject: Submission of Marketing Materials in Response to CMS RFI [CMS-0042-NC], "Request for Information; Health Technology Ecosystem"

Dear CMS and ONC Team,

We are pleased to submit our response to the Request for Information [CMS-0042-NC] titled "Health Technology Ecosystem," published by the Centers for Medicare & Medicaid Services (CMS) and the Assistant Secretary for Technology Policy/Office of the National Coordinator for Health Information Technology (ASTP/ONC).

Guidehouse is a leading global provider of advisory services, supporting a range of capabilities in management, technology, and risk consulting. We work broadly across the healthcare industry ecosystem, serving federal and state government agencies, payers, providers, and life sciences companies. Through this work, we offer a 360° perspective on how to optimize health technology, processes, business models, and regulations to drive efficiency and quality across the industry.

We are grateful for the opportunity to present CMS information about how Guidehouse could support initiatives that address many of the questions in the subject RFI. Our health technology solutions align closely with the objectives outlined in the RFI, particularly in areas such as patient empowerment, data interoperability, care navigation, and value-based care. By giving consumers greater control over their healthcare experiences and ensuring new technologies are evaluated with equity and access in mind, we aim to close gaps in technical functionality and service. Moreover, our expertise in interoperability standards and stakeholder engagement reflects our commitment to fostering a connected and effective health technology ecosystem.

Below is a sampling of recent, relevant examples of the capabilities and expertise Guidehouse can deploy to CMS to support your technology journey:

Advanced Data Analytics and Interoperability Solutions:

- **Beneficiary Data Enrichment** (Reference: RFI Question TD-2): VitalAudit® is a proprietary data enrichment and remediation service designed to help public and commercial sector organizations identify and confirm deceased individuals across the U.S. and locate their beneficiaries. Unlike other solutions that rely on external data connections, VitalAudit curates data in-house before it is used to support client work, ensuring comprehensive

customization options and enabling deployments behind agency firewalls. *Learn.more.in. Appendix.A;*

- **Predictive Analytics for Population Health Management** (Reference: RFI Question TD-2): Our advanced analytics tools leverage multiple data sets to predict patient outcomes, identify high-risk populations, and support proactive care management, ultimately reducing costs and improving health outcomes. Learn more: Modernizing Data Management in Public Health

Patient Empowerment and Care Navigation:

- **Patient-Centered Platforms** (Reference: RFI Questions PC-1 to PC-7): We develop and deploy cloud-based technology platforms that empower patients with access to their health records, personalized health insights, and tools for care management. These platforms are designed with user-friendly interfaces and mobile accessibility to ensure broad patient engagement. Learn more: Elevating Patient Access and the Consumer Experience
- **Care Coordination Tools** (Reference: RFI Question PR-7): Our solutions facilitate effective care coordination among healthcare providers, ensuring that patients receive timely and appropriate care. This includes integrating care plans, tracking patient progress, and enabling communication across clinical care teams. Learn more: Leveraging the Advanced Practice Providers Care Model

We welcome the opportunity to engage further with CMS and ONC to support future initiatives or provide additional information. Should you have any questions or require further details, please do not hesitate to contact us.

Thank you for your consideration.

Sincerely,

Greg Hafer

VitalAudit® Beneficiary Data Enrichment for Government Agencies

Monitor benefit recipient mortality, locate missing beneficiaries, and reduce improper payments

Local, state, and federal agencies often face challenges in collecting and verifying data on deceased benefit recipients. Ensuring that government payments reach only the intended recipients is a complex task, requiring access to accurate and up-to-date information. Without a reliable way to identify decedents and their beneficiaries, agencies risk misallocating taxpayer dollars to improper payments.

By enhancing payee data with nationwide state, federal, and commercial sources, agencies can optimize and streamline payment operations while combatting fraud, waste, and abuse. VitalAudit® is a proprietary data enrichment and remediation service designed to help public and commercial sector organizations identify and confirm deceased individuals across the U.S., and locate their beneficiaries. Unlike other solutions that rely on external data connections, VitalAudit curates data in-house before it is used to support client work, ensuring comprehensive customization options and enabling deployments behind agency firewalls.

Key Features and Benefits:

- **Agency Impact** – A client leveraged VitalAudit to uncover more than $3 million in improper payments to deceased benefit recipients within only a few weeks.
- **Tailored Approach** – Granular, end-to-end customization enables agencies to adjust confidence thresholds and reporting requirements to their specific needs.
- **Industry Trusted** – VitalAudit is widely used in the commercial sector by financial institutions, including 4 of the top 5 life insurers, banking technology providers, asset managers, and other organizations.

With exclusive data partnerships and a proven approach, VitalAudit leads the market in decedent data accuracy and coverage. By integrating VitalAudit into their operations, agencies can strengthen payment integrity for the good of every American.

By combining Guidehouse's death audit and beneficiary locate capabilities, VitalAudit® standardizes, augments, and remediates contact information in an intelligent and cost-effective way, achieving an industry-leading 98% nationwide mortality coverage curated from more than 30,000 state, federal, and exclusive commercial repositories. The solution captures most mortalities within 10 days of death through a regulatory-compliant, secure, and transparent process resulting in measurable and immediate cost savings for local, state, and federal agencies.

98%	**Nationwide mortality coverage**
80%	**Reported within 10 days of mortality**
150M+	**Records processed per month**

VitalAudit® augments internal data to help optimize operations, combat fraud, and create a better customer experience.
