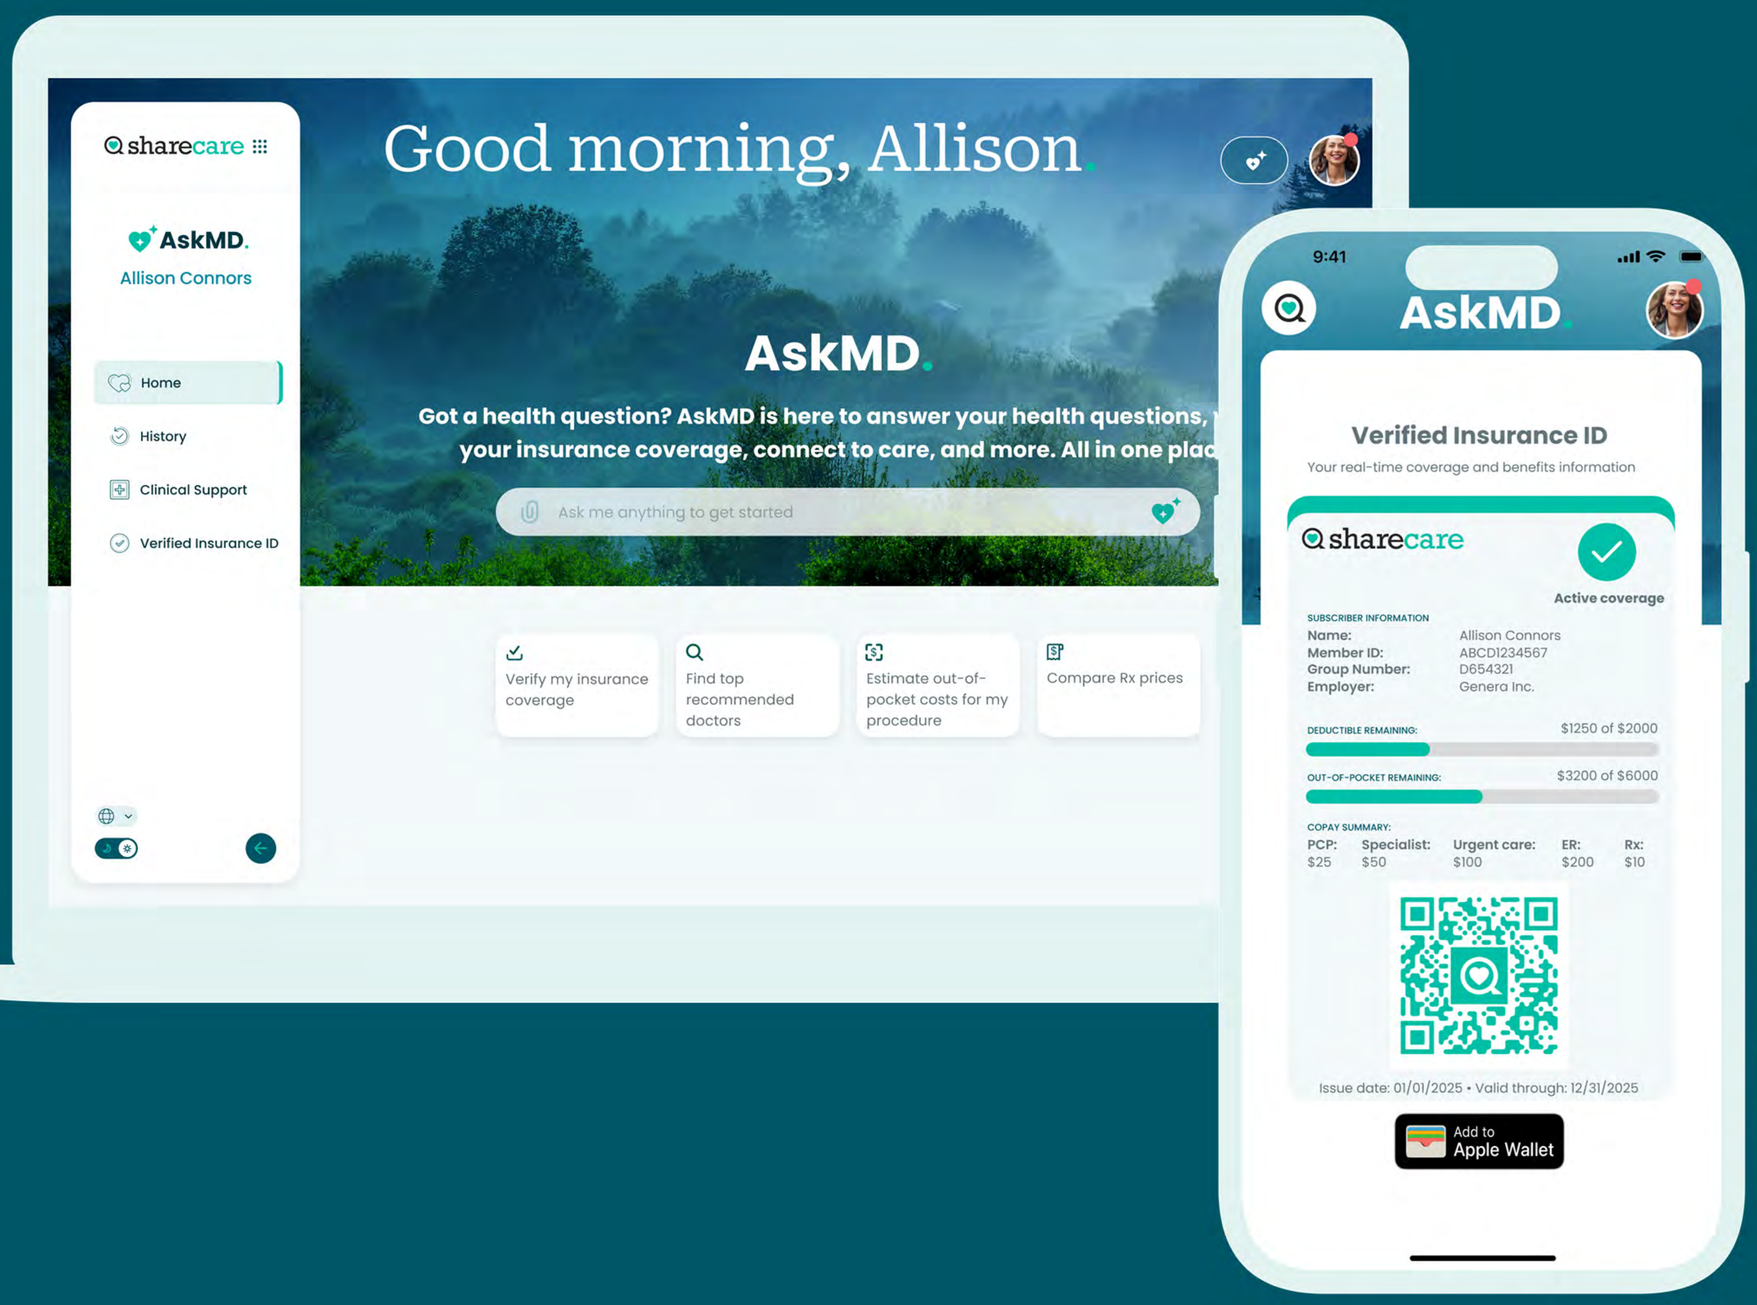
AskMD.
Smart health. Made human.

AskMD is the doctor in your pocket—powered by a purpose-built clinical Large Language Model (LLM) that makes healthcare navigation personalized, intelligent, and financially actionable.

The consumer platform to replatform healthcare

AskMD leverages state-of-the-art clinical foundation models to provide patients with trustworthy, actionable medical guidance contextualized in their personal health data. At its core, AskMD is not just a product—it is an entirely new consumer operating system for health, built on a proprietary clinical reasoning engine. By combining real-time data, AI-driven triage, insurance integration, and compassionate communication, AskMD delivers what today's healthcare ecosystem has never been able to offer: accessible, trusted, and cost-aware guidance at scale.



Core components

- Clinical LLM
- 'Verified Insurance ID'
- Integrated insurance support
- Interactive clinical reasoning
- Personalized guidance
- Smart provider recommendations
- Accessible, intuitive interface
- Multiple languages
