Electronic Caregiver

Delivering AI Driven Continuous Connected Care to Optimize Health & Wellness for All

electronic caregiver

It's all about CARE

ECG's Vision:
Leverage AI, Ambient Sensing, & Engagement to Provide Curated, Actionable Insights to Care Providers to Improve Outcomes

*"By 2030, every modern home in the world will have a primary care interface … and this will be **Addison**"*

- ***ECG's mission*** is to prolong aging-in-place and independent living while improving quality of life, healthcare delivery, and outcomes for people with chronic illness, and to maximize value for our clients and shareholders.
- ECG is perfectly aligned to address the challenges from provider shortages, increased population of seniors, and a global pandemic of chronic disease.
- ECG's use of generative AI transforms patient engagement while delivering significant operational efficiencies.

ECG Overview:
Product, Services, & Solutions

- ECG's patient engagement, **vertical integration**, data analytic capacity, and open platform create value at every point in the healthcare ecosystem.
- The pandemic catalyzed remote patient monitoring (**RPM**), chronic care management (**CCM**), driving demand for comprehensive, hybrid-care solutions.
- While the current focus is on aging & infirmed patients, the market is evolving to include wellness, health maintenance, and addressing **social determinants of health**.
