

Ai Agents React to Rural Patient Inquiry and Respond With Options

Medical Avatars Guide Patients Remotely Toward Healthcare Choices

Ai Avatars Tethered Together Are Patented By FastHealth

Why Does Rural Alabama Need Healthcare Innovation and Support Right Now?

Clear reasons in four points

Pressures Today

- Rising Costs & Staffing Shortages
- Distance/Transport Barriers
- Aging Infrastructure & Cyber Risk

Why Tech Adoption Now

- Better Care, Lower Expense (Virtual + Remote)
- Prevention & Chronic-Care Tools
- New Revenue Streams

Alabama Advantage

- Unified Virtual Rural Health Center Standard
- Patent-Anchored Sole Source Provider
- Ready Governance (Governor's Office, SHPDA, Medicaid)

National Impact

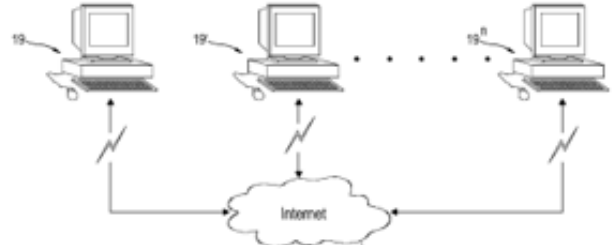

- Improves Likelihood of Federal Support

FastHealth Was Granted The U.S. Patent After Final U.S.P.T.O. Appeal

System and Method for Avatar Tethering

SOLE SOURCE PROVIDER

Gache (57) ABSTRACT A system for tethering a plurality of avatars to a user on a social networking website having a first avatar association to the user accessing the social networking site which is held in a database, and a second avatar association to the same user. The first avatar association connects the user to an avatar image that the user wishes to project, and the second avatar association connects the user to a third party advertiser that has its own avatar. Optionally, the user has a third avatar association connecting the user to the avatar of the website sponsor. A webserver generates web pages for the social networking website in response to a remote PC's request and, relying upon the stated avatar associations, delivers a webpage having the two or three avatars adjacent to a one another and adjacent to a communicative activity of the first user on the social network website. 29 Claims, 9 Drawing Sheets <pre>graph TD 19_1[19] --- I((Internet)) 19_2[19] --- I 19_3[19] --- I</pre>
