HealthEx

Unlocking Patient-Directed Data Exchange

The HealthEx Leadership Team

Deep ties to healthcare and technology

Priyanka Agarwal, MD, MBA

Co-founder & CEO, HealthEx

Former Associate Professor of Medicine, UC San Francisco

Former Head of Digital Health, MyoKardia / Bristol Myers Squibb

Harvard MD, MBA

Anand Raghavan

Co-founder & CTO, HealthEx

Former VP of Product / Engineering, BlueJeans and Verizon

Formerly at Microsoft

Formerly at Yahoo

UC Berkeley Engineer

Hemant Taneja

CEO, General Catalyst

Board Member, HealthEx

Author of Intended Consequences, UnHealthcare, Unscaled

Steven Lane, MD, MPH

Executive Advisor, HealthEx

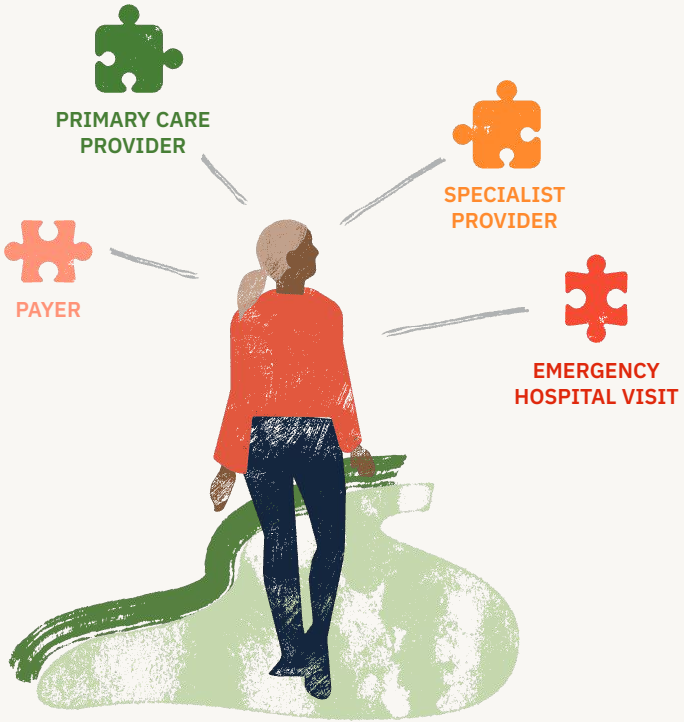
Chief Medical Officer, Health Gorilla

Former Chair, Carequality Steering Committee

Confidential and not for distribution

Fragmented Access, Frustrated Patients

Patients carry the burden, while organizations carry the cost of $20B in avoidable admin work.



Payers' Challenge Today

Limited access to real-time, non-claims clinical data hinders payers' ability to manage patients

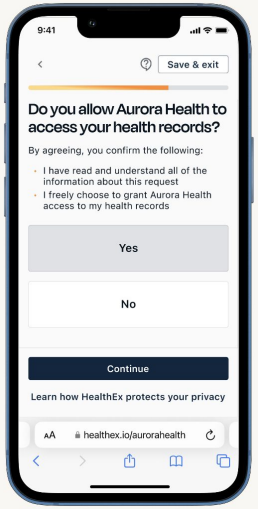
Barrier to close care gaps and provide relevant care management support

Delay in care due to time to process prior authorizations, referrals, and other care needs

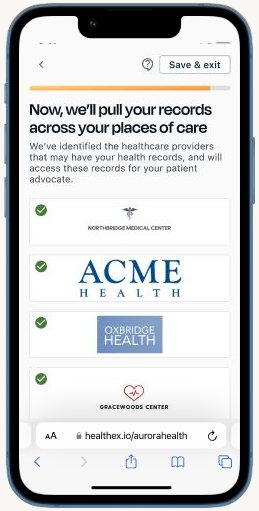
Inability to meet quality incentive requirements and determine value of care delivered

HealthEx's Data Rights Management Platform

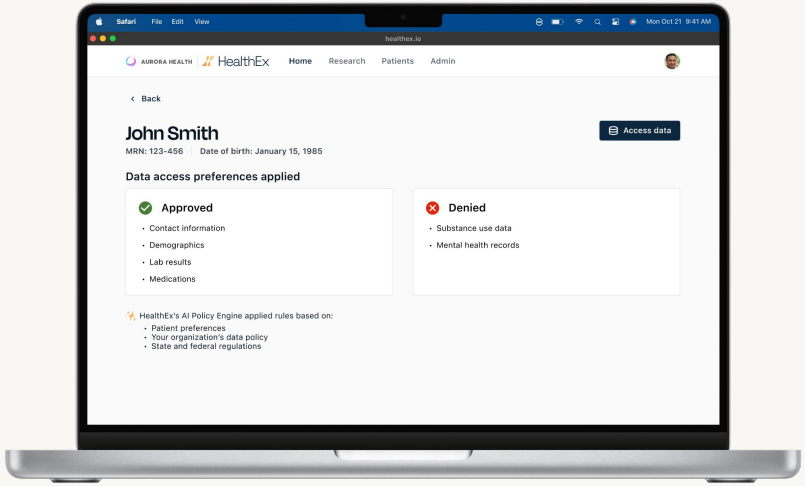
Empowers patients and seamlessly integrates with organizations' existing systems



Patient Consent & Data Management Portal



Patient-Directed Data Exchange



AI-Driven Data Policy Engine

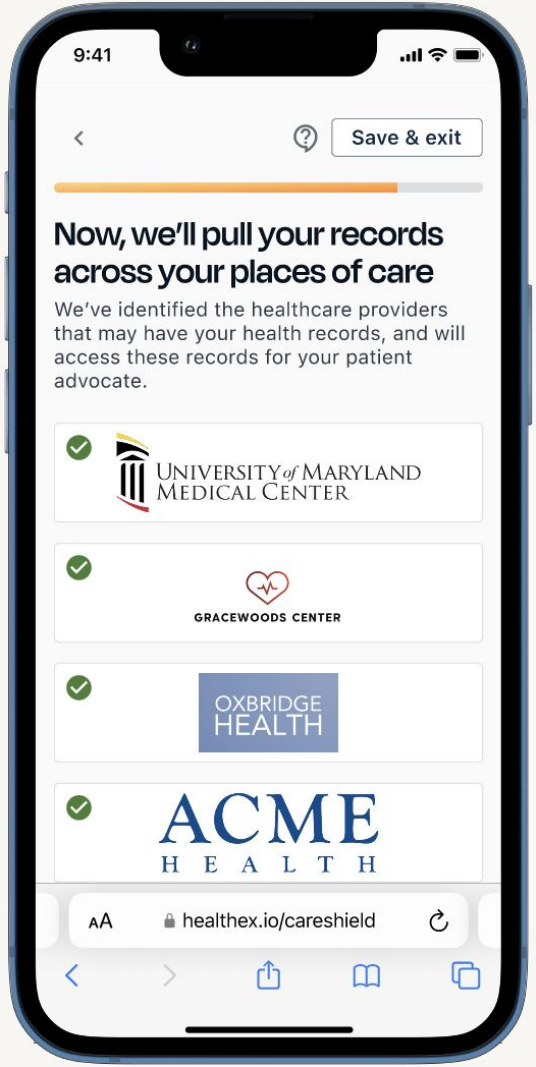
CURING COMPLEXITY

HealthEx | healthex.io

Enabling Patient-Directed Data Exchange

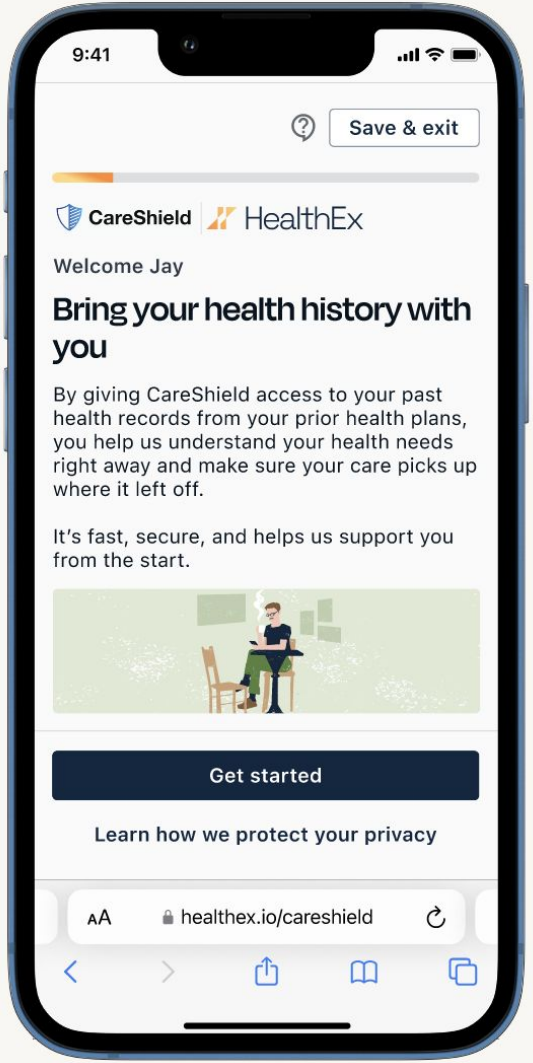
Patients access, control, and share their health data — anywhere, anytime.



HealthEx | healthex.io

Seamlessly take advantage of CMS-0057-F APIs

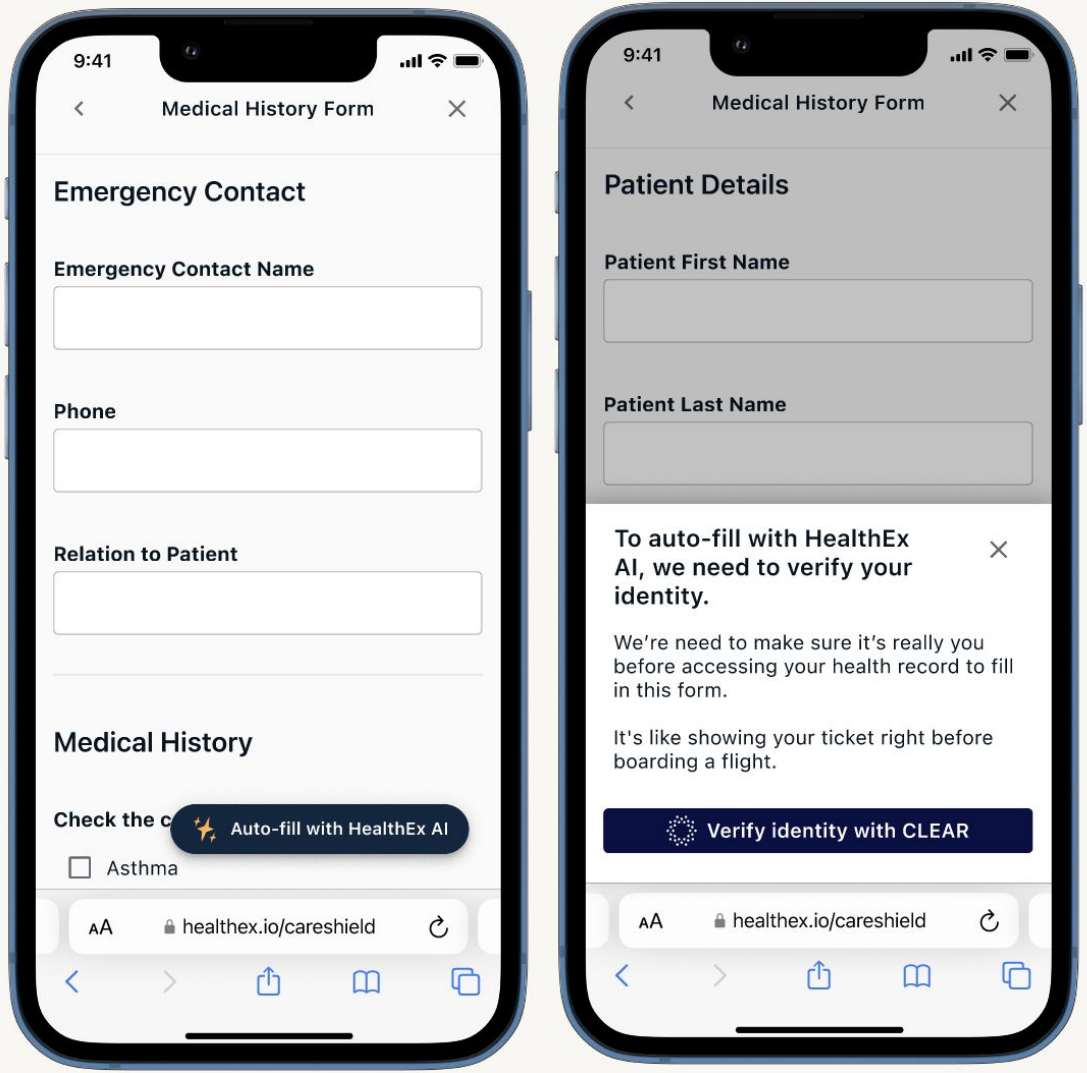
Patients can easily consent to payer-to-payer data access



HealthEx | healthex.io

Simplify the patient experience

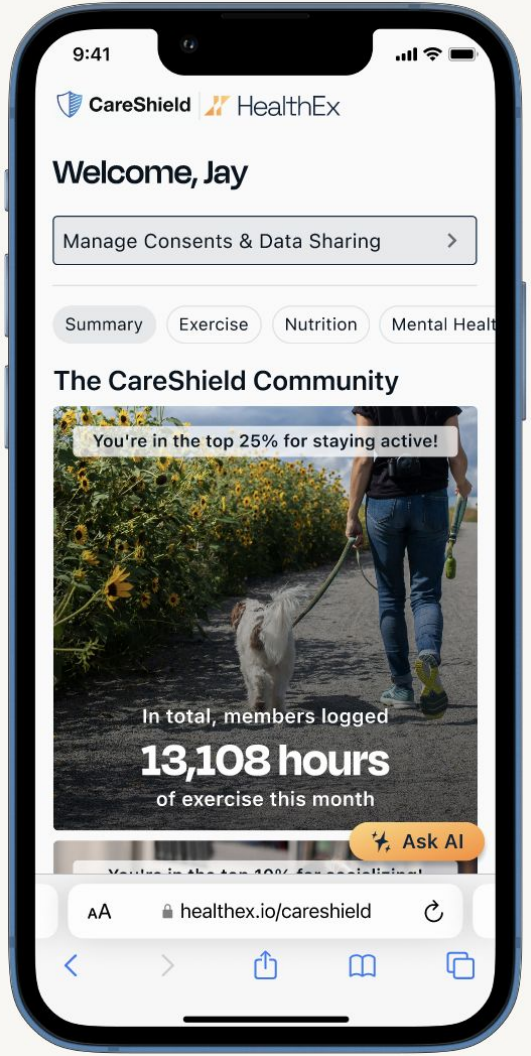
Extract data from clinical records and save patients time by filling out forms using AI

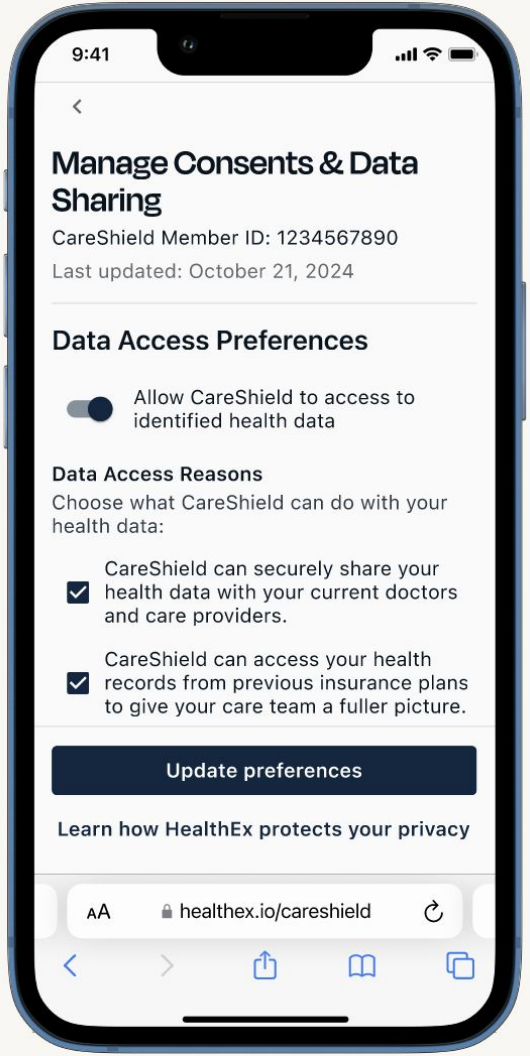


HealthEx | healthex.io

Reframe the Data Access Conversation

Patients can update their consents and data privacy settings, at any point in their care journey.





HealthEx

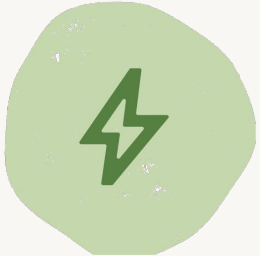
HealthEx supports a wide range of high value use cases

Value based care & quality initiatives	Access real-time patient data to enhance care coordination, medication adherence, population health initiatives, and other quality initiatives like HEIDS or STAR measurements
Prior auth, referral, risk adjustment, and claims data support	Access real-time patient data to improve prior auth and referral management turnaround times, and enable improved risk adjustment and claims data approval rates
Consent-aware enforcement tools	Ensure patient data is accessed compliantly and can be utilized at scale, by providing consent-aware enforcement tools and customized data policy engine support across your system. Includes support for CMS-0057-F, clinical research, data privacy & more
Interoperable data access	Enable data access via TEFCA-aligned infrastructure, for a unified, real-time view of patient data including prescriptions, encounters, and lab results across care sites

Delivering Value Across the Ecosystem

Real-time access to clinical data drives benefits for payers and patients

Close care gaps & enable value-based care



Empower & engage patients

Meet quality incentive requirements & understand the value of care delivered

HealthEx

Empowering patients starts here

Join us in advancing consumer-directed data exchange at scale.
